

The Modernization & Centralization of I.T.

NORTH AMERICAN
Stamping Group

North American Stamping Group is a manufacturing organization supplying a very competitive automotive market with medium to high volume, stamped metal components and welded assemblies. NASG is a privately held company that was formed in 1979 with sales of over \$350 million annually. NASG is one of the largest tier II stampers / assemblers in North America. Their manufacturing footprint allows full coverage of the NAFTA market from Canada, through the southern USA and down through Mexico. With their Tech Center, over 90 stamping presses, over 1,000,000 square feet of manufacturing and most importantly 925 inspired associates we are well equipped to handle the larger global architecture platforms that will be used in multiple facilities throughout North America.

The Challenge

CENTRALIZATION

Centralize infrastructure across three countries in North America.

DATA RECOVERY

Supply the best in class data recovery solution.

MIGRATION

Migrate / move all assets & data to the cloud environment including ERP, CRM, and large number of servers.

The Solution

With 8 Fully redundant data centres across Canada, Server Cloud Canada's team and infrastructure was proven to be the clear leader in terms of support, flexibility, and transparency.

SCC was also able to provide assistance in the migration process to ensure all of NASG's assets and data were successfully moved to the cloud environment.

The Results

- ✓ Flexibility in a scalable environment
- ✓ Infrastructure cost reduction
- ✓ Great disaster recovery plan for risk management & cyber security
- ✓ Modern and centralized cloud infrastructure

Solution Overview

DESCRIPTION

Modern and centralized infrastructure that can be accessed from anywhere.

INDUSTRY

Automotive

GEOGRAPHY

North America

CHALLENGES

- ✓ Partner they can trust.
- ✓ Scalability for growth.
- ✓ No downtime.
- ✓ Dedicated Private Cloud Solution

SOLUTION

Server Cloud Canada met all requirements. The technical team gave the best solution and service in terms of migration. With 8 fully redundant datacenters, this will make it easy to scale up and ensure high availability

BENEFITS

- ✓ Improve data quality process.
- ✓ Time to perform enhancements and make changes on the fly.
- ✓ Enabling IT team to concentrate on client focussed technologies.
- ✓ Centralized IT infrastructure across 3 countries
- ✓ Low cost DR Solution to help with risk management

"Their people are always available when we need them, and their migration assistance was pivotal in our success"
